SUNSTREAM® SPORTLIFT™ NAMED TOP PRODUCT

Kent, Wash. – Sunstream® Boat Lifts, the leading manufacturer of high-quality free-standing and free-floating boat lifts and the SwiftShield™ Automatic Boat Cover System, announced today that its all-new SportLift™ has been selected by *Boating Industry* as one of the 2022 Top Products.

The SportLift simplifies storing, launching and accessing water toys. A spacious 7 x 9 foot, multi-use platform gives ample area to load a kayak, canoe, SUP or other water toy and safely enter the water by lowering the platform with the press of a button. When finished, users can simply paddle to the platform and gently raise the SportLift out of the water and store their water toys on the included rack.

To be eligible for consideration, products or services had to have been introduced or significantly updated since January 2021. With hundreds of well-qualified submissions from manufacturers across every segment of the industry for consideration, selecting top products was no easy task for the *Boating Industry* editorial team. The winning products were chosen based on many factors such as their impact on the industry, innovation and how they advanced their category.

“This has been an incredible year for Sunstream,” said Ken Hey, CEO of Sunstream Boat Lifts. “With a number of new products receiving recent recognition, we are thrilled that our latest product, the SportLift has been chosen for this distinction. We thank the judges for their consideration in selecting us for this award.”

The safest way for paddlesports enthusiasts to access on the water, the SportLift helps unclutter dock space with an included rack with bungies. With easy swimming access and a comfortable place for in-water lounging, the SportLift is a great enhancement over a dock ladder. A center handle enables safe and easy loading and unloading, and the included remote control adds convenience. The platform has a lifting range of up to five feet with range extenders. It can be installed in water as shallow as 19-inches and as deep as 21-feet.
